A few years ago, when Osage Nation was actively seeking a quality facility for our data center colocation project, we visited several providers. After careful consideration Data 3 was selected as our partner. Our decision was made based on the resiliency of the infrastructure including their multi-vendor service provider approach and redundant backup and safety systems. The ability for Data 3 to provide our organization with operational space and plenty of parking in the event of disaster at our main data center was also great benefit. The final selling point for Osage Nation though was the personalized quality service we received and continue to receive from Dave and his staff. I heartily recommend Data 3 for any data center project. If anyone has any questions, please feel free to contact me.

Thanks,
