

January 25, 2016

To Whom It Concern,

We are starting our 10th year as a customer of the Data3 Corporation data center in Tulsa, OK. During this time we have had excellent service by David Harrelson and his team at Data3 working with us as we continued to grow our business more than four fold. The Data3 team has always been professional and available night or day, even in adverse weather if we have needed them for any services. During this 10 year period we have only had one unplanned outage and that was for approximately 10 minutes according to our monitoring systems.

More important than simply giving excellent service for us over the long run, David and the team at Data3 have always worked with us to provide the best solution to our needs, not just a cookie cutter one-size-fits-all solution. Data3 is a trusted partner in our data center needs, not just another supplier. Data3 is working as a partner to help make me successful, and that is why we are starting our 10th year in the Data3 data center.

Sincerely,

Gregg Robbins
Director of Technical Services
BNSF Logistics, LLC
